GEORGE ENGELMANN PAPERS coccuse the above and have my discount My house is surmed with them our any plant when their are served hundred, some very fine and frathe Santer Perse there is one that measures
ag francis the first lind-measure 16 12-2
colorous 75 ft, lat moday it shades half an Ut my Summer place I formed an valo sime years all that I have new seen any show cles. I More booker crew where for it If me rule gove me ductions what putind of it to sund me de de the Escaperante mentionations mil is Rundar to the miles outs, at the same place There is an abundance of The 2 Marchina which Michause, considers a parity of The Milmoratio, the Mans curs, back de face cx althe like The live onto, I is call here the dreat me vako a smale tranch from me stu dan can seaucet, be dretinguishing!

Rea April 26 Waresley Mill Grongeton Co De Geo Englemann. Den Sui paper so 190 red fit which I thoush of me. Escense lingth I repetition in this my Most to clear up some points about The Kur ratio tutus My allinhow mas first almached to them by seeing the little myrres car Them, Escammali som commed me that the touder ones, were Easily distinguished by the Julian potato like shins. The morely hough ins having a darker how shire. This was m'the spring how, The summer of 1899 produced an much Enjoy of account during Nov. Der of 49 farmy & fud my pies in this may the secular gur mination was bright to my writer + many hundred epicinius cocanined in various stages

The stage is represented by figs, this occur very The seems stage is represented by fig 2, the radicle semethates the soil o almost nurmediately the sulling brens, on this pout for seem doubtful but I have not the least doubt-about it. The 3° stay is represented by hig 3° The developement is knine in lees rapid according to Ruperature moisture & netwers of the soil in this stage the titu is puficilly while & very Kudu The 4th stage is represented by fig 4 & seems ? mi Disc in cight with according to concumelates the confedous of the acom circhning healthy om fell viste, impaising nomishment-to the hite mute four or five strong healthy Maris are formed, at which and Thew puction The ene of the Fitter is determined, by The richtess routhur of the poil This I have concluded. from the fact-of furting hitces

The layest titu I have ere seen mas one I sut to must mas formed mi a neh garden, t the smallest I also sent to me shaped like a button of it grew mi a place made hand by some otto plasting. How love the hiter continues to good oper. the strong the shape I carret pay but I am is instrued to though it grows with The June hu, padually brughness of many beenses the " mani a Fap rot. I have united at these condusins from coming many hundred acoust hebres gastina under The hus growny mi various licalities, I also plantes since actions mi a lose on my prayse I Manua The same results. I will be much others to me for any other papers pur publish in this subjectalvisit to the court of Swith Cantina in The mouths of Dieenter a famining ruhen The line Daks are looking then best I
